INTRODUCTION

MICHAEL RUNDELL
Editor-in-Chief

The *Macmillan Collocations Dictionary* (MCD) provides a complete record of the most typical ways in which common English words combine with one another. These word combinations are known as 'collocations', and this is an important concept for anyone learning, teaching, or using English. According to Professor Michael Hoey, who heads the Macmillan Dictionaries Advisory Panel, collocation is 'the property of language whereby two or more words seem to appear frequently in each other's company'. Long before computer corpora became available, linguists noticed the tendency of some words to 'stick together', in expressions like *conduct a survey, highly effective*, or *rapturous applause*. Nowadays, with a corpus of 1.6 billion words at our disposal, we can reliably identify the most frequent English collocations.

That's the easy part. But lists of collocations on their own are not especially helpful. In order to make this information useful for teachers and students, our team of lexicographers has divided up the various collocations according to the meanings they express. For example, if you are talking about an *argument* (in the sense of 'a set of reasons you use for persuading people'), the corpus provides a long list of words (or 'collocates') which are frequently used with this noun. Our job is to analyse these collocates and sort them into useful sets, such as words meaning 'a strong argument' (*compelling, persuasive, powerful*, and so on), or an argument that is 'sensible and well-argued' (*coherent, rational, well-reasoned* etc) or one that is 'based on incorrect facts' (*spurious, fallacious* etc). For this meaning of *argument*, the MCD provides six sets of adjectives and five sets of verbs, each expressing a different meaning. Every set has its own definition, its own list of collocates, and its own example sentences to show how these combinations work.

Why is collocation so important? Firstly, it is a central feature of language, and – whether you are speaking or writing – it is just as important as grammar. Getting the grammar right is an essential part of producing text which is free of errors. But selecting appropriate collocations is one of the keys to sounding natural and fluent. For this reason, a good collocations dictionary is a valuable resource if you are preparing for IELTS or similar examinations. Secondly, collocation contributes to meaning. Most common words in English have more than one meaning, and we use the surrounding context to indicate (or work out) which meaning is intended. Collocation plays a big part in this process. Consider, for example, the word *goal*, which can mean either something you want to achieve or a point scored in football. When you see *goal* with verbs like *set, achieve,* or *pursue* (or with verbs like *score* or *concede*), you know immediately what is meant, and it is collocation which provides the clue. As the linguist J.R. Firth said, in a famous quotation, 'You shall know a word by the company it keeps'.

Some features of language, such as wordplay, figurative uses, or cultural references, may be seen as 'optional extras' which you can use once you are really fluent. Collocation is not like this. Once you have progressed beyond beginner level, collocation is essential to expressing ideas in the most natural-sounding way. With the *Macmillan Collocations Dictionary*, you have the ideal resource for developing this important skill and using collocation with confidence.

USING THE DICTIONARY IN IELTS

SAM MCCARTER
ELT Author and Teacher

The *Macmillan Collocations Dictionary* (MCD) is a valuable resource for anyone using English in an academic or professional context. It shows how the most frequent words in English typically combine with each other, and with other words, to form natural-sounding chunks of language – and this is what makes it an especially useful tool for people taking the IELTS exams.

There is an important distinction to be made between IELTS (the International English Language Testing System) and other exams. The purpose of IELTS is not to test students' *knowledge* of the English language, but to assess their *competence* in using it. Students are not awarded a pass or fail, but their scores are reported on a scale ranging from 1 ('Non-User') to 9 ('Expert User').

The word *User* is critical. Rather than testing students' knowledge of grammar or of specific vocabulary items, IELTS evaluates their ability to use the English language in the completion of tasks (within fairly tight time limits) in the four main skills of Listening, Reading, Writing and Speaking. This focus on testing *competence* rather than *knowledge* has implications for students and teachers alike, especially with regard to learning vocabulary.

Let us take, for example, a student who is about to take IELTS, and who has a reasonably large vocabulary of, say, around 7,500 words. A vocabulary of this size is a desirable asset for anyone aiming to achieve a score of 6.5–7 in the academic version of IELTS. But learning words from vocabulary lists is not enough. If our imaginary student has no awareness of how words work naturally together, he/she will be at a disadvantage compared to someone who may have a smaller vocabulary (say 5,000 words), but who is able to use those words effectively by combining them in natural-sounding collocations.

What this illustrates is the importance of learning to use vocabulary, at speed, across tasks within the four main skills. This will improve fluency, clarity of expression, and naturalness – and hence competence in general.

The need for such flexibility in manipulating words to create the kinds of combinations that a fluent speaker would produce naturally is what makes the *Macmillan Collocations Dictionary* an ideal companion for students as they prepare for the IELTS exam.

How producing natural collocations can help IELTS students

There are two aspects of vocabulary that illustrate the relevance of collocation and the value of a dictionary like the MCD:

- the relationship between frequency and 'coverage': research shows that the most common English words make up a high percentage of everything we read or write. The most frequently-used words (the top 2,500) account for almost 80% of all text, while the 7,500 most common words make up over 90%.
- The relationship between frequency and collocation: the more frequent a word is, the more likely it is to enter into 'partnerships' with other words, forming combinations which convey a sense of naturalness and style.

This has implications for *processing information* in the four main skills tested in IELTS.

Processing information: Listening

In the IELTS Listening Module, students

have to be able to process information at natural speed which they hear only once. Grammar and listening skills apart, such processing for students aiming for Score Band 7 requires an ability to identify facts and ideas, to see the relationships between them, and to recognize paraphrases and summaries. From the IELTS student's point of view, the skill of predicting relationships between words in collocations or identifying the paraphrase of one collocation to another at speed is very useful.

At a fairly simple level, this can be illustrated by the alternatives students might have to choose from in a multiple-choice question. As students have to process what they hear while listening, quick understanding of the audio and the questions is essential. Look at the second entry for the word *basic* in MCD:

2 of products or services, needed by everyone

- ADJ+n **amenities, essentials, foodstuffs, necessities, needs, sanitation** *Their parents have to work from morning till night to provide the basic necessities.*

A question in the Listening Module might look something like this:
Their parents have to work from morning till night to provide the _____.

a *basic necessities*
b *school fees*
c *expensive clothes*

In the listening module, the speaker might say something like: ... *supply the children with accommodation, food and clothing*. Knowing that the word *basic* is frequently combined with *necessities* to mean things like *accommodation, food and clothing* makes it easier to process information while listening. If students have to think about the meaning of the two words combined, it will slow them down. Furthermore as the vocabulary used in the audio, and in the questions, is likely to be drawn from the most common 2,500 to 7,500 words (either as single items or in combination), then it makes sense to include work on collocation and on possible paraphrases as part of a course.

Processing information: Reading

The reading passages in the academic version of IELTS are long – around 800 words each and up to 2,700 words for the three passages – and students have to answer 40 questions about the passages in one hour. The skills needed for negotiating a text include skimming, scanning, rapid recognition of text type and organization, and the ability to process grammar at speed. But a flexible use of vocabulary can further enhance competence in reading. A good starting point is to acquire a thorough working knowledge of the most frequent English words and – critically – to learn the various ways in which they typically combine to form natural-sounding and predictable collocations.

Reading and processing speeds can surely be enhanced by a detailed understanding of the ways in which words fit together. If we take another entry from the MCD, for the word *significant*, a knowledge of collocation can help students predict as they read. In a text about the important consequences of a policy or decision, for example, the use of the adjective *significant* will 'prime' readers to expect nouns such as *impact* or *effect* to follow:

... *have a significant impact on the economy of the region.*

And collocation manipulation will also help the student to see that the phrase '... *benefit that part of the country considerably*' in a reading passage is being paraphrased by the phrase above in a True/False/Not Given statement or multiple-choice question. As the MCD shows, other words with which *significant* regularly combines, to express the idea of an important result or effect of something, include *implications, consequence, influence,* and *benefit*. These provide yet another rich source of language to manipulate for paraphrasing and summarizing.

The ability to understand and use collocations helps students to increase their speed in processing information as they predict the text that is to cover the blank pages to come.

Building fluency and sounding natural: Writing Task 2

In Task 2 of the academic version of IELTS, students are required to write a minimum of 250 words. A student with a good grasp of collocation has a distinct advantage, as we can see by again looking at the entry for *significant* in the MCD. It shows the nouns and adverbs that most frequently combine with *significant* to express a wide range of ideas. If you want to say something is 'very significant', there is a choice of typical adverbs. Or again, there are sets of nouns for conveying ideas like 'a significant achievement', 'a significant problem or challenge', or – as discussed already – 'a significant effect or result'. Here we look at the set of nouns frequently used to express the idea of 'a significant event or change':

- **ADJ+n** event or change **action, change, decision, development, improvement, initiative, move, trend** *The most significant recent development has been the introduction of an integrated fares and ticketing structure.*

Let's say a student makes a spelling or a grammatical mistake in the sentence (for example, writing *The most significent recent development* or *Most significant recent development*); despite these mistakes, the message is clear. But look at the difference if the student uses words of similar meaning but in unnatural combinations, and writes:

The most key recent act has been the initiative of an integrated fares and ticketing arrangement.

Though the sentence is not 'incorrect', its intended meaning is much less clear, because inappropriate words have been chosen, resulting in untypical collocations. If this is then repeated with the same consistency throughout an essay, with or without grammar or spelling mistakes, it becomes more difficult for the reader (the Examiner), to recover the meaning. Texts like this give the impression the writer lacks fluency and is operating with a limited working vocabulary. Yet, with even quite small changes, the meaning would become more transparent and the text as a whole would feel more natural.

Building fluency and sounding natural: Speaking Parts 2 and 3

The need for fluency becomes even more critical in the Speaking module of IELTS. In Part 2 students are expected to talk about a particular topic: for example, *Describe a recent development in your life that you felt was important.* A good way of demonstrating a wide vocabulary is to employ natural collocations which paraphrase what the Examiner says, rather than just repeating the exact words, for example: *I'm going to talk about a recent change in my life that was very significant.* If students are hesitant as they pick their way through the words that they *know* or simply repeat the words of the Examiner, this will affect their Score Band for vocabulary and fluency. Part 3 covers many abstract topics similar to those covered in Task 2 of the Writing module. Here, students are asked to talk about subjects such as the development of technology and its effects in the workplace or on domestic life. Again, the student who is able, with minimum hesitation, to choose words that fit together to make natural collocations is more likely to achieve a higher Score Band.

The *Macmillan Collocations Dictionary* is a useful companion for anyone working in an academic or professional context or taking exams such as FCE, CAE Proficiency, ILEC and ICFE. For IELTS, it is an especially valuable resource which seems tailor-made to meet the needs of students preparing for this exam.

GUIDE TO THE DICTIONARY

argument N
1 an angry disagreement between people

2 a set of reasons used for persuading others

- adj+N strong **compelling, convincing, persuasive, powerful, strong, valid** *While it has been claimed that this approach could increase resources for development assistance, there are equally compelling arguments that it may divert scarce aid resources.*
- ▸ weak **unconvincing, weak** *The proposal is based on an unconvincing argument.*
- ▸ most important **central, core, main** *Without doubt, the book's central arguments are compelling and backed up with a wealth of evidence.*
- ▸ sensible or well-argued **cogent, coherent, logical, plausible, rational, reasoned, well-reasoned** *I have seen very cogent arguments for and against the Scottish system of comprehensive education.*
- ▸ based on incorrect facts or reasoning **fallacious, flawed, spurious** *Sadly, this is a hopelessly flawed argument.*

You can also say that there is ***a flaw in*** someone's argument: *There are at least two major flaws in your argument.*

- ▸ about a particular subject **ethical, legal, philosophical, political, theological** *These hypotheses are used as premises in a number of philosophical arguments.*

- v+N suggest or use an argument **advance, articulate, deploy, make, outline, present, produce, provide, put forward, supply, use** *There is adequate opportunity to present new arguments and evidence.*
- ▸ think of or develop an argument **construct, develop, formulate, hone** *I could do with some help formulating my argument.*
- ▸ not accept an argument **disagree with, dismiss, rebut, refute, reject** *This book rebuts every argument ever offered to 'prove' God's existence.*
- ▸ make an argument weaker **contradict, counter, demolish, undermine, weaken** *This material goes some way to counter these arguments.*
- ▸ make an argument stronger **bolster, endorse, lend weight to, reinforce, strengthen, substantiate, support** *It supports our argument that what matters is efficiency, not achieving targets.*

Headword and word class (**N**= noun).

When a word has more than one meaning, each meaning is shown by a **number**. A **definition** is given for every meaning.

Codes show grammatical relationship between headword and collocates: adj+**N** means the noun (**N**) **argument** often occurs with the adjectives listed here; v+**N** means the noun is often the object of the verbs listed here.

Note (with grey background): we use these notes when there is a common way of expressing the same idea using a phrase rather than a collocation.

The same **grammatical relation** (like v+**N**) is often used to express different ideas. Each of these sets has a **definition** (like 'think of or develop an argument'), a list of **collocates** (like **construct** or **develop**), and one or more examples.

enhance V
improve something

- adv+V very much **considerably, dramatically, enormously, greatly, immeasurably, significantly, substantially, vastly** *This is an important development which will greatly enhance trade links across Europe.*

▸ in a particular way **artificially, chemically, digitally, genetically, nutritionally, surgically** *We have the professional expertise to digitally enhance photos.*

Usage ***Enhance*** is often passive in these combinations: *They believe genetically enhanced crops will help poor farmers in developing countries.*

- V+n reputation or appeal **attractiveness, credibility, employability, prospects, reputation** *An award can influence the sales of a book, and enhance the reputation of the author.*

Usage note (with pink background): we use these notes when a collocation needs to be used in a particular way, for example when a verb is often in the passive or a noun usually in the plural.

funding N
money from a government or organization for a particular purpose

- adj+N more **additional, extra, further, increased** *We support increased funding **for** library services.*

▸ enough **adequate, sufficient** *We believe that adequate funding of museums should be continued.*
▸ available **available** *Contact your local council for full information on available funding.*
▸ types of funding **external, public** *The reality is that without public funding it would be impossible to fully prepare the case for a long trial.*

- n+N from government **government, state** *The charity does not receive any government funding.*

▸ source of funding **grant, lottery** *The trust has secured grant funding **from** the Heritage Lottery Fund and sponsorship for the project.*
▸ what funding is used for **project, research** *At the moment we have about £1.2m **in** research funding.*

- v+N get funding **attract, find, get, obtain, raise, receive, secure, win** *We have already secured funding to help with security and heating.*

▸ try to get funding **apply for, bid for, request, seek** *This partnership successfully applied for funding **from** external sources including the Millennium Commission.*
▸ give funding **allocate, approve, award, commit, provide** *The Commission will take the final decision on whether or not to award funding.*
▸ increase funding **increase** *They have now increased funding for the immunization programme.*
▸ stop or reduce funding **cut, reduce, withdraw, withhold** *The House of Representatives has voted to cut nearly all funding **for** the program.*
▸ decide to use funding for a particular purpose **earmark** *Separate funding has been earmarked for the provision of networked computers.*

When a word is often followed by a particular preposition (such as 'from' or 'for'), we highlight this using bold type in the example.

Aa

abandon V

stop doing or planning something or supporting an idea

- adv+V completely **altogether, completely, entirely** *It would not be until the 20th century that science would completely abandon the notion that the universe had always existed.*
  - ▸ almost completely **effectively, largely, virtually** *By 1941, the policy of internment had been largely abandoned.*
  - ▸ quickly **hastily, quickly** *They quickly abandoned any plans for expanding the business that year.*
  - ▸ when something is abandoned **eventually, finally, quickly, soon** *By the 16th century attempts to construct a proper harbour were finally abandoned.*
- V+n **attempt, belief, faith, hope, idea, plan, pretence, principle** *He called on the government to abandon plans to hold a referendum.*

ability N

the power to do something or the skill in doing it

- adj+N very good or impressive **above-average, amazing, exceptional, extraordinary, proven, remarkable, uncanny, unique** *He seems to have an uncanny ability to recognize and develop talented footballers.*
  - ▸ natural, rather than learned **innate, instinctive, natural** *George's exceptional natural ability on the piano was soon recognized.*
  - ▸ types of ability **academic, cognitive, creative, intellectual, linguistic, mental, musical, organizational, physical, psychic, technical** *Some of these problems arose because a number of the users had limited technical ability.*
- v+N have or show ability **demonstrate, develop, have, possess, prove, show** *The ideal individual will have demonstrated their ability to work independently and as part of a multi-disciplinary group.*
  - ▸ not have ability **lack, lose** *We are on the verge of losing our ability to tell one plant or animal from another.*
  - ▸ have good or bad effect on ability **affect, enhance, impair, improve, increase, limit, restrict** *How you respond to stress affects your ability to think clearly.*

abnormal ADJ

not usual or typical and possibly harmful

- ADJ+n the way something looks or behaves **behaviour, movement, pattern, reaction, response, result, rhythm** *Many captive elephants appear to display abnormal behaviour.*
  - ▸ in medical use, way something develops or occurs in the body **bleeding, cell, discharge, gene, growth, tissue** *Another biopsy revealed more abnormal cells but no cancer.*

abolish V

officially get rid of a law or system

- adv+V **altogether, completely, effectively, finally** *Taxes on savings and dividends will be abolished altogether, except at the higher rate.*
- V+n practice or institution **death penalty, monarchy, poverty, slavery, slave trade** *In 1833 slavery was abolished in all British colonies.*
  - ▸ tax or payment **charge, duty, fee, grant, subsidy, tax** *The party has announced its intention to abolish tuition fees if it wins the next election.*
  - ▸ rule or law **law, limit, requirement, restriction, rule** *The Bill also abolishes the requirement for private companies to hold an annual general meeting.*

abortion N

an operation that prevents a baby from being born

- adj+N when it is done **early, late, late-term** *She supports a woman's right to decide, but she is not supportive of late-term abortions except in cases where a woman's health is endangered.*
  - ▸ types of abortion **backstreet, illegal, legal, medical, unsafe** *The demand for the right to safe and legal abortion was an important issue for the contemporary women's movement.*
- v+N have or perform an abortion **carry out, get, have, perform, seek** *The decision about whether to have an abortion or continue with a pregnancy is not an easy one to make.*
  - ▸ allow/not allow legal abortion **allow, ban, legalize, oppose** *Abortion was first legalized in this country forty years ago.*
- N+n relating to the operation **clinic, pill, rate, service** *Legislators have passed a measure which would require abortion clinics to be licensed and regulated by inspectors.*
  - ▸ relating to the issue **debate, law, right** *It is well established that women travel abroad to circumvent restrictions in their own national abortion laws.*

absence N

1 not being in usual place

- adj+N length or frequency of absence **frequent, long, long-term, persistent, prolonged, short, short-term, temporary** *Invigilators have been asked to note temporary absences and will record these on script covers when they are collected in.*
  - ▸ allowed, or for a good reason **authorized, sickness, unavoidable** *In the case of sickness, or other unavoidable absence, ensure that you obtain a copy of all notes and handouts before the next class.*
  - ▸ unreasonable or not allowed **unauthorized, unexplained** *If a student leaves before that date, this may be considered taking unauthorized absence or truancy.*

2 when something does not exist, especially something needed or wanted

- adj+N complete **complete, total** *There is a complete absence of modern teaching aids such as computers.*
  - ▸ noticeable or almost complete **apparent, conspicuous, marked, notable, relative, virtual** *This*

author has already noted the conspicuous absence in this report of any consideration of alternative clinical explanations.

- N+of **agreement, data, evidence, explanation, proof, support** *Other scholars would insist that we should follow the biblical text in the absence of contrary evidence.*

absorb V

take in gas, liquid, heat etc

- adv+V **easily, quickly, rapidly, readily, slowly** *Extensive research suggests that a liquid is absorbed far more quickly than tablets or capsules.*
- V+n **carbon, energy, heat, light, liquid, moisture, nutrients, radiation, vitamins, water** *Cotton is a natural fabric which absorbs moisture.*
- V+into **blood, bloodstream, body, cell, skin, tissue** *Alcohol passes through the stomach and small intestine and is absorbed into the bloodstream.*

abstract ADJ

not related to physical objects or real events

- adv+ADJ **fairly, highly, purely, rather** *Each item is liberally illustrated with diagrams making it easier to visualise what is going on in what is often a fairly abstract concept.*
- ADJ+n **argument, concept, idea, notion, principle, reasoning, theory, thinking** *He can express complex abstract ideas in easily comprehensible language.*

abstract N

a summary of a report, speech, or academic paper

- v+N write or send an abstract **provide, send, submit, write** *The deadline for submitting abstracts is February 1st.*
- ▶ examine or accept an abstract **accept, read, referee, review** *All accepted abstracts will be included in the CD-ROM publication of the conference proceedings.*

absurd ADJ

stupid, unreasonable, or silly

- adv+ADJ very or obviously **completely, manifestly, patently, quite, totally, truly, utterly** *To have a city like London with no coherent system of government was manifestly absurd.*
- ▶ rather **faintly, rather, slightly** *His patriotism was so impulsive as to be slightly absurd.*
- ADJ+n **allegation, argument, belief, claim, conclusion, idea, notion, position, situation, suggestion** *We could end up with the absurd situation where government doesn't have anything to do with British business.*

abuse N

1 cruel, violent, or unfair treatment, sometimes involving forced sexual activity

- adj+N **domestic, emotional, physical, psychological, sexual** *Domestic abuse takes many forms, many of them not at all violent in nature.*
- n+N **child, elder, human rights, sex** *Today, we would be saying that this is a terrible case of child abuse.*
- v+N suffer abuse **endure, experience, suffer** *The British Medical Association estimates that one in four women will suffer physical abuse from a partner during their lives.*
- ▶ commit abuse **commit, perpetrate** *The regime has committed grave human rights abuses.*
- and/or **exploitation, neglect, violence** *Following neglect or abuse, many young people have been in local authority care for a number of years.*

2 the illegal, dishonest, or harmful use of something

- adj+N **appalling, blatant, flagrant, gross, systematic, widespread** *People concerned about ethical issues have formed groups that collectively aim to prevent gross abuses.*
- n+N **alcohol, drug, solvent, substance** *There is an alarming increase in the number of children being treated for alcohol abuse.*
- v+N prevent abuse **combat, curb, prevent, stop, tackle** *Pharmacy bodies have welcomed the Government's recognition of the potential role of pharmacy in tackling drug abuse.*
- ▶ situation in which abuse can happen **be open to** *A system more open to abuse would have been difficult to devise.*
- N+of **authority, position, power, privilege, system, trust** *The UK-wide investigation started earlier this year in the wake of concerns about supermarkets' abuse of power.*

3 angry offensive comments

- adj+N **homophobic, racial, racist, verbal** *Racial abuse was daily directed at residents going about their business.*
- v+N **hurl, scream, shout, subject sb to** *As he left the pitch he hurled some abuse at the referee.* • *Many of these asylum seekers and refugees have been subjected to racial abuse.*
- n+of+N **term** *In Elizabethan England, 'puritan' was a term of abuse.*

abuse V

1 treat someone very badly

- adv+V **emotionally, physically, sexually** *He works particularly with young people who have been sexually abused within their own families.*

2 use something in an illegal, dishonest, or harmful way

- V+n power, position, or system **authority, freedom, position, power, privilege, status, system, trust** *It seems that people in positions of power are, once again, abusing their position.*
- ▶ alcohol or drug **alcohol, drug, substance** *When Hugh left school at 16, he began to abuse alcohol.*

abusive ADJ

1 using offensive or insulting language

- ADJ+n **call, comment, email, language, message** *We will not add comments which use abusive language.*

- and/or **foul, insulting, offensive, threatening, violent** *Any player guilty of using foul and abusive language will be instantly dismissed from the field of play.*

2 involving cruel or violent behaviour

- ADJ+n **behaviour, childhood, conduct, marriage, partner, relationship, situation** *He had a history of violence and of abusive behaviour to women.*
- and/or **controlling, cruel, drunken, neglectful, violent** *She needs help to get away from a violent and abusive relationship.*

academic ADJ

relating to education, especially in colleges and universities

- ADJ+n people **community, department, institution, researcher, staff, tutor** *The college is situated in Bloomsbury, the heart of the academic community in London.*
- ▶ work, achievements, and qualities **achievement, course, discipline, excellence, programme, qualification, research, standards, study, subject, work** *Your CV should clearly set out your skills, experience, academic qualifications and personal details.* • *Some students do much of their academic work at home using their own computer facilities and so spend less time on campus.*
- ▶ job **career, position, post** *A higher proportion of women hold academic posts at this college than at any other leading U.S. university.*
- ▶ writing **article, journal, paper, publication, writing** *This is a compilation of academic conference papers which explore the relations between critical theory and information technology.*

academic N

teacher at a college or university

- adj+N **distinguished, eminent, leading, prominent, respected, senior, top, world-class** *Astor Visiting Lecturerships provide funding for visits by distinguished academics from the United States for up to one week.*

accelerate V

happen, or make something happen, faster

- adv+V **dramatically, greatly, rapidly, sharply, significantly** *Since Malta's accession to the EU in May 2004, finance sector growth has rapidly accelerated.*
- V+n **decline, development, evolution, expansion, growth, pace, process, progress, rate, trend** *We will use what we have learnt from the inspection process to accelerate the pace of change.*

accent N

pronunciation that shows where someone comes from

- adj+N how strong **broad, heavy, pronounced, slight, strong, thick, unmistakable** *I was served by a woman who spoke English **with** a very thick accent.*
- ▶ showing where someone is from **foreign, regional, American, English, French etc, northern, southern etc** *Helen calls across to Pat **in** a broad Scottish accent, 'Pat, please turn down the TV'.* • *I dialled the number and a bluff voice **with** a slight northern accent responded cheerfully.*
- ▶ upper-class **posh** INFORMAL**, upper-class** *With her posh English accent, she isn't quite right in this role.*
- v+N have or speak with an accent **adopt, do, have, put on, speak in, speak with** *You have a French accent, you cannot deny that.*
- ▶ lose an accent **lose** *His mother hasn't lost her Russian accent.*

accept V

1 take something offered

- adv+V **gladly, graciously, gratefully, reluctantly, willingly** *Contributions will be gratefully accepted.*
